OBJECTIVE

Getting a position of QA Engineer.

SUMMARY

I have a mathematics education and experience in testing websites and mobile applications. I have a good theoretical knowledge base and practical skills in preparing test cases (TestRail), preparing bug reports (Jira, GitLab). I have experience in using SQL, HTML, CSS. I really want to move further into automation. I am the motivated and development-oriented person who sees himself as a member of a self-sufficient team. I hope that with my participation the team will make effective decisions to assess the quality of a software product and write optimal test cases. This will serve to create a quality product. In teamwork, I value relationships, personal qualities and professionalism.

SKILLS

- Knowledge of testing theory, testing types and test design techniques
- Understanding of SDLC/STLC, Bug Life Cycle
- Understanding of testing methodologies
- Experience in Web testing/ Mobile Testing
- Experience in Dev tools (Chrome dev tools etc.)
- Experience with bug reporting tool (JIRA, GitLab)
- Experience in designing test documentation (Check-lists, Test Cases, Bug reports)
- Experience with a test management tool (TestRail)
- Knowledge of HTML, CSS, SQL
- Understanding of CI/CD concepts
- Understanding of client-server architecture
- Understanding of networking (TCP/IP, DNS protocols, HTTP etc.)
- Experience in API testing (Postman)
- Base knowledge of Java
